CYBER INSURANCE · 10-MINUTE SCORE

Your insurer already has a checklist. Do you?

Renewal questionnaires keep asking the same things. Score yourself before the underwriter does: one point per box you can check *and prove.*

> *"Your underwriter is not impressed by 'we're pretty careful.'"*

Enforced MFA — _ / 3

- ☐ Email & Microsoft 365 / Google
- ☐ Remote access & VPN
- ☐ Admin / privileged accounts

EDR / MDR — _ / 3

- ☐ On every endpoint & server
- ☐ Monitored, not just installed
- ☐ Alerts go to an actual human

Immutable + tested backups — _ / 3

- ☐ Offsite copy that can't be altered
- ☐ Restore tests on a schedule
- ☐ Results documented

Written incident-response plan — _ / 3

- ☐ Who calls whom, in order
- ☐ Tabletop exercise completed
- ☐ Reviewed in the last year

Patch cadence — _ / 3

- ☐ Critical patches on a defined clock
- ☐ Unsupported OS retired
- ☐ Proof you can export

Awareness training — _ / 3

- ☐ Phishing training for all staff
- ☐ Simulated phish results
- ☐ Onboarding includes it

YOUR SCORE

___/18

16–18 Renewal should be boring. Nice.
10–15 Gaps an underwriter will find.
0–9 Call before the questionnaire arrives.

Documentation counts as much as tools.

"Yes, we have MFA" gets a follow-up: everywhere? enforced? screenshot? If you can't show it, it didn't happen.

To be clear: we don't sell insurance. We make the application boring, in the good way. Requirements vary by carrier and policy; your broker has the final word.

Get your free renewal-readiness score.

We'll score you against what renewals actually ask, and hand you the to-do list.
